EXPERIENCE

Full time Web Developer Student— *Freelance Web Developer*

January 2019 - PRESENT

- Specialized in full-stack development with React.js and Next.js, building and deploying diverse side projects.
- Explored modern frameworks like Vue, Angular, and Astro, while mastering scalable, performance-focused web design.
- Gained deep understanding of frontend/backend architecture, CI/CD workflows, and reusable component development.

Tune Protect Malaysia, Wisma Capital A— *Internship Web Developer*

April 2024 - July 2024

- Developed 90% of the frontend for a dashboard using Gatsby.js and integrated REST APIs.
- Worked closely with the team in a Scrum sprint environment to deliver features efficiently.
- Improved team collaboration and code quality through agile workflows and best practices.

Freelancing, Upwork— *Freelance Frontend Developer*

December 2024 - PRESENT - [My Upwork Profile](#)

- Delivered 12–13 responsive pages within 9 days for clients from France and Costa Rica, meeting tight deadlines and design specs.
- Collaborated closely with backend developers to integrate APIs and ensure smooth frontend-backend communication.
- Completed 3–4 custom Next.js projects tailored to client needs, focusing on performance, SEO, and modern UI/UX standards.
